Perfect sound, always.

A U D E A R A

Perfect sound, always.

As doctors, we saw people dealing with hearing loss first hand, and decided to do something about it.

We set out to build a device that would make hearing tests quicker and more easily accessible. We then realised how this information could be used to tailor sound perfectly for the needs of each user.

Audeara was born: Technology that allows you to enhance music, entertainment and communication by focusing on what really matters - what you can hear.

Perfect sound, always.

Test your hearing, tailor your sound.

Brand	Threshold Hearing Test	Track Your Hearing Health	PHONE/TABLET APP		Bluetooth or Wireless	Active Noise Cancelling	Tailored Sound	Battery Life
			Customisable/Controllable	Track your hearing health				
Audeara A-01	✓	✓	✓	✓	✓	✓	✓	35
Bose QC35	X	X	X	X	✓	✓	X	20
Sennheiser RS195	X	X	7 presets	X	✓	X	X	18

Diverse features.

The A-01's allow you to watch tv, listen to music or make phone calls wirelessly and with ease. Audeara headphones are light weight and easy to use and do not require a docking station to recharge. A simple charging cable is provided.

Every person hears differently and your left ear hears differently to your right. Using the Audeara app, we chart these differences so you can visualise and track your unique hearing profile as it changes over time.

Your hearing profile is programmed into your headphones which tailor the music to **you**. This feature allows the sound to be enhanced through precision not volume, making it clearer not louder. Listen to your favourite shows without having the volume up high.

Audeara, perfect sound.

Audeara headphones can be used as an assistive listening device for people with hearing loss that affects their day to day lives. The A-01's can easily be used in conjunction with any hearing aid or cochlear implant. The headphones test your hearing and tailor the sound to you.

Simple hearing test

Adjust left & right ear independently

Perfect sound

Experience sound quality like never before. Find new parts in your favourite song, hear notes you didn't know existed! We put you at the heart of the audio experience by focusing on what really matters - what you can hear.
